

Sustainability at our Core

Our Sustainability Mission

Our Promise to the Planet

Sustainability is at the heart of everything we do — not just a goal, but a responsibility. Every choice, big or small, creates meaningful change. From eco-friendly packaging to renewable-focused initiatives, we're committed to reducing our environmental impact and contributing to a cleaner, brighter future.

Our sustainability mission is a promise: to lead by example, innovate responsibly, and empower others to do the same. Together, we can make sustainability more than a statement — we can make it a standard.

Turning Values into Action

Eco-friendly materials: We use durable, recyclable packaging and source resins from suppliers expanding recycled and renewable material solutions.

Lower-carbon sourcing: We choose resin suppliers investing in renewable energy, emissions reduction, and more sustainable production practices.

Reduced waste: By sourcing from recycling-focused suppliers and offering recyclable pails, we help keep plastics in use longer and reduce waste.

Sustainable sourcing: We partner with suppliers that publish clear sustainability and ESG commitments, helping align our products with responsible standards.

Community engagement: We support community, education, and sustainability initiatives through our suppliers and local involvement.

Our Vision for the Future

We see sustainability as a journey, not a destination. Our goal is to continue advancing towards zero waste, 100% renewable operations, and fully circular product life cycles.

Every product we design, every partnership we build, and every innovation we pursue brings us closer to a world where sustainability is simply the way business is done.

We invite you to join us — because a sustainable future is something we build together.
